

ANAS ABD ELAZIM

Senior Flutter Developer | AI-Native Mobile Engineer

+20 106 073 6137 · anasabdelazim602@gmail.com · github.com/moshkla · linkedin.com/in/anas-abd-elazim · Egypt · Remote / Saudi Arabia

PROFESSIONAL SUMMARY

Senior Flutter developer with 6+ years building cross-platform mobile applications — including a year of native Android — for teams across Saudi Arabia, the UAE and Egypt. 17 production applications shipped to the App Store and Google Play across govtech, fintech, healthcare and commerce, built on Clean Architecture, Bloc/Cubit and a feature-first structure. Currently principal mobile engineer on Kanaf, a Saudi Ministry of Justice-affiliated platform where AI document extraction, face verification and geofenced check-in are shipped production features. Works AI-native: LLMs in the daily engineering loop, and LLM tool-calling agents built end to end.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, Java, App Store & Google Play release management
Architecture: Clean Architecture, SOLID Principles, Feature-First structure, Repository Pattern, MVVM, Dependency Injection (get_it), functional error handling (dartx) · **State Management:** Bloc, Cubit, Provider, GetX
APIs & Backend: REST APIs, GraphQL, Dio, WebSockets, Firebase, Pusher, JSON serialization
AI & LLM Integration: Large Language Models, Anthropic Claude API, LLM tool-calling agents, AI document extraction, Prompt Engineering, AI-assisted development and code review (Claude Code, Cursor, GitHub Copilot)
Testing & Quality: Unit Testing, Widget Testing, Bloc/Cubit Testing, Integration Testing, TDD, Maestro, Code Review
Data, Storage & Payments: Hive, SQLite, flutter_secure_storage, SharedPreferences, GetStorage · MyFatoorah, Amazon Payfort, PayTabs, Moyasar, Apple Pay, Google Pay, In-App Purchases
DevOps & Release: CI/CD (GitHub Actions, CodeMagic), Shorebird code push, Git, FVM, Sentry, Crashlytics
Integrations: Google Maps & Flutter Map, Geolocation, Camera & liveness detection, Nafath identity verification, Agora, Zoom, LiveKit, Firebase Messaging & Remote Config, Dynamic Links (Branch & Firebase), PostHog, Firebase Analytics
UI & Craft: Responsive UI (MediaQuery, ScreenUtil, Responsive Framework), Multi-theming, Arabic/English localization & RTL, implicit & explicit animation

PROFESSIONAL EXPERIENCE

Senior Flutter Developer & AI-Native Engineer — Tiebah Tech 01/2026 – Present

Saudi Arabia

- Principal mobile engineer on **Kanaf** (below), a Saudi Ministry of Justice-affiliated custody visitation platform on Android and iOS; own the architecture and the majority of a codebase spanning roughly 25 feature modules.
- Set the mobile team's architecture standard — Clean Architecture, feature-first, one Cubit per concern — and review code across the codebase; the same template now underpins a second product, **Mosleh**.
- Established release and observability infrastructure: GitHub Actions and CodeMagic pipelines, an FVM-pinned SDK with a lockfile guard, and Sentry, PostHog and Microsoft Clarity in production.
- Work AI-native — LLM-assisted implementation, pre-review passes, architecture pressure-testing and documentation — and ship AI into the product itself, from court-deed extraction to face verification at handover.

Senior Flutter Developer — IT Cores 08/2024 – 12/2025

Remote

- Shipped three production applications to the App Store and Google Play — **FinZey** (consumer financing), **WinVeston** (investment) and **Arco Services** (service marketplace) — owning feature architecture from design through release.
- Applied Clean Architecture, SOLID principles and a feature-first structure with Bloc/Cubit state management over REST backends, and mentored developers through structured code review.

Flutter Developer (Mid-level → Senior) — Code Link 08/2022 – 04/2024

Saudi Arabia · Full-time, Remote

- Built and maintained production Flutter applications for the Saudi market over nearly two years — including **PureneSS**, **On Nota**, **No7** and **Almajdyah Residence** — progressing from mid-level to senior on the team.
- Delivered payment flows across MyFatoorah, Amazon Payfort, PayTabs, Apple Pay and Google Pay, alongside in-app purchases, on a Bloc/Cubit and Clean Architecture foundation.
- Shipped and maintained releases on both stores, using CodeMagic for CI/CD and Shorebird for over-the-air updates.

Flutter Developer (Mid-level) — TCL, Technical Chemical Laboratories 01/2022 – 08/2022

United Arab Emirates · Part-time, Remote

- Built cross-platform Flutter features against RESTful backends for a UAE laboratory services company, integrating Firebase Cloud Messaging and Analytics.
- Worked asynchronously with a distributed team across time zones.

Flutter Developer (Junior) — Metwereen 02/2021 – 10/2022

Egypt

- Built cross-platform applications from design handoff through store release, working across Provider, Bloc and GetX with responsive, pixel-accurate interfaces on both platforms.

Egypt

- Contributed production features to client applications, including the **Banhawy ENT** clinic app; adopted testing, Git workflow and code review practice in a team setting.

Android Developer — Freelance

06/2019 – 06/2020

Remote

- Built native Android applications in Java for independent clients, handling scoping, delivery and client communication directly.

SELECTED PROJECTS**Kanaf — كنف**Tiebah Tech · Affiliated with the Saudi Ministry of Justice · Android & iOS · [App Store](#) · [Google Play](#)

Lets separated parents arrange and carry out court-ordered child visitation transparently, with each handover documented in a neutral, verifiable way.

- AI deed pipeline:** the app uploads a court visitation deed, extraction returns structured data, and a one-tap clarification flow resolves ambiguity before the schedule is confirmed.
- Identity & safety:** Nafath government verification, ID capture with liveness detection and face comparison at handover, a multi-level LiveKit-backed escalation system, and incident notes with severity and photos.
- Location & timing:** GPS check-in, live delivery tracking and a countdown-governed handover window.
- Compliance scoring and risk dashboard; WebSocket event chat with polling fallback; Moyasar subscriptions; FCM push with a Remote Config-driven campaign engine.
- Built on flutter_bloc Cubits scoped per concern, go_router, get_it, dio and dartz, with Arabic/English RTL localization, biometric app lock and unit, Cubit and integration test coverage.

WhatsApp AI Receptionist

Personal engineering project · Node.js, TypeScript, PostgreSQL, Anthropic Claude API

A multi-tenant WhatsApp receptionist that reads a customer's message in their own Arabic and books, reschedules or cancels appointments through a fixed tool surface.

- Constrained the agent to act only through the booking engine's tools — it cannot reach the database, invent a price or a free slot, or confirm a booking the engine refused.
- Built the deterministic booking engine underneath it: availability, working hours, service duration, staff selection and double-booking prevention enforced by PostgreSQL constraints.
- Added durable message processing with exactly-once persistence and retry with backoff, human handoff to staff, per-turn telemetry, and a role-based operator dashboard.

FinZey — فيزي · IT Cores · Fintech · Android & iOS · [App Store](#) · [Google Play](#)

Personal financing applied for and tracked entirely in-app. Built the staged application flow, secure document handling and Bloc state.

WinVeston — وينفستن المالية · IT Cores · Investment · Android & iOS · [App Store](#) · [Google Play](#)

Investment platform spanning real estate and other asset classes, with portfolio tracking and charting over a REST backend.

Arco Services — أركو للخدمات · IT Cores · Services · Android & iOS · [App Store](#) · [Google Play](#)

Service-booking platform for one of Saudi Arabia's leading manpower companies — package browsing, booking and payment.

Diet Watchers · Food & Health · Android & iOS · [App Store](#) · [Google Play](#)

Meal subscriptions with calorie-counted portions. Built the subscription, payment and delivery flows with push notifications.

Rentop — Car Rental, Dubai · Marketplace · iOS · [App Store](#)

Real-time availability, hotel and airport delivery, pay-on-delivery. Built the maps, booking and payment-gateway integrations.

Hayatona Clinics — عيادات حياتنا · Telehealth · iOS · [App Store](#)

Patients book and attend virtual appointments over video, audio or chat. Built the video-calling and appointment flow.

Meer — مير · Marketplace · iOS · [App Store](#)

Marketplace pairing advertising creatives with business owners — portfolios, project posting and offers over real-time chat.

On Nota — عالحساب · Code Link · E-Commerce · iOS · [App Store](#)

Grocery and everyday-essentials shopping app built around a fast weekly shop, from browsing through checkout and payment.

Banhawy ENT — دكتور بنهاوي · Technoraft · HealthTech · Android · [Google Play](#)

Patient-facing app for an ENT specialist practice, covering appointment booking and clinic information.

PureneSS — بيورنس · Code Link · On-Demand Services · Android & iOS · [App Store](#) · [Google Play](#)

On-demand car wash brought to the customer. Built the booking, provider selection and payment flows.

No7 — نوح · Code Link · Home Services · Android & iOS · listing retired

Carpentry services — custom wooden piece design, installation, maintenance and on-site measurement requests.

Siru Map — سيرا · Geospatial · Android & iOS · listing retired

Aligns the places and events of human civilizations on a shared map and timeline, tracing how histories connect.

Smart Minds — العقول الذكية · EdTech · Android & iOS · listing retired

Daily lesson review linking students, teachers and parents, tracking comprehension and progress.

ADDITIONAL PROJECTS

Also shipped (Android/iOS): Mosleh · Almajdyah Residence · Saladbar Vending Machines · Wakkt

Open source: Heraj (Flutter auction app) · Fruit Market (Flutter storefront) · MyMall (native Android, Java) — github.com/moshkla

EDUCATION & TRAINING**Bachelor of Computers and Information — Computer Science**

Mansoura University, Egypt · 2020

Artificial Intelligence Trainee — IBM · 2017

LANGUAGES & AVAILABILITY

Arabic — Native · English — Professional working proficiency
Open to remote roles and on-site opportunities in Saudi Arabia.
